# PAS CONTRACTOR COMPENSATION QUARTERLY 

## THE MARCUM EDITION

No. 28-1, 2020

The Contractor Compensation Quarterly (CCQ)
is especially designed for the busy construction executive who needs to keep abreast of competitive compensation and benefit levels within the industry.

## 2019 ACTUAL AND 2020 EXECUTIVE PAY FORECAST

Pay increases continue to hover above the $4 \%$ mark. The 2019 Executive actual increase came in at $4.2 \%$. The projected 2020 executive increase is $3.9 \%$. Historically predictions are usually about $.5 \%$ low, but this may not be
the case in 2020. We will know late in the second quarter if executive increases continue the "over 4\%" trend. For comparison, WorldatWork is projecting a $3.3 \%$ average increase for all executives in 2020.

## 2015-2019 REGIONAL SALARY INCREASES VERSUS ANTICIPATED 2020

The following figures reflect the anticipated 2020 salary increases and the actual 2015, 2016, 2017, 2018 and 2019 salary increases by region. Again, only those
survey responses greater than 0\% were used in the calculations. Company responses were included in each region in which the firm works.

## Joe's View

The world has changed dramatically since our last quarterly report. As essential workers, most contractors worked through COVID-19-mandated shutdowns, but they have had to incorporate safety protocols, including staggered work schedules, the use of personal protective equipment (PPE), and increased sanitation practices. Now is the time to find ways to retain employees by rewarding great performance, being flexible, and providing flexibility. Watch for our upcoming Marcum National Construction Survey report, which reveals that the lack of skilled labor is ranked the greatest business threat and a top priority among survey respondents. To address this issue, more than one-half of respondents report they are increasing compensation, followed closely by employee recognition and appreciation programs. Contractors can view the full survey results in late July by visiting our website.

## Jeff's View

Though this situation is different, in the worst years of the Great Recession, when an employer said they froze pay, what they really meant was they froze pay for some, but not all. There are many stories that some who received pay increases during the Great Recession were those who whined and not necessarily those who were the most deserving. So, in today's crisis, if you need to compensate someone, be selective and reward your best employees whether it's through variable pay or a bump in base pay.

And finally, this is our annual reminder that the most objective way to prove your company's compensation is within the "normal" parameters of the industry is to use industry surveys. These surveys help define the industry standards which is precisely why participation is so important. These standards are just one step in establishing a sound pay program with structure and guidelines on how your employees are compensated.

## COVID-19 - THE IMPACT ON PAY PROGRAMS

Leading up to the last two weeks of this first quarter, there were many online job postings, usually with "immediate need" suggested in the wording. There were multiple headlines touting the lack of skilled and experienced workers. And then there were talent managers working overtime to fill vacancies. Since then, the number of job postings for executive, middle management and professional positions has significantly slowed down and the headlines are now all about COVID-19. What a difference two weeks makes. But, as you know, the need for key and experienced employees didn't really go away, it just got sidetracked by a virus.

Our associations are kicking into overdrive to keep up with the impact on construction. Ken Simonson of AGC reported in Data Digest that a Mid-March survey of 909 contractors indicated that $28 \%$ of the survey participants replied yes to the question "Has any owner, government agency or official directed you to halt or delay work on any projects that are either active or expected to start within the next 30 days?" AGC is continuing to update their survey on a regular basis. So much happening so quickly.

And what does this mean for pay?
Without a doubt, some companies will respond to the virus crisis with pay freezes or postpone annual increases for a period of time. It's just an immediate response to the unknown. However, many contractors are already in catchup mode in order to stay market competitive. Remember that many of your peer's granted a $4.2 \%$ pay increase in 2019. On top of that, many companies already bumped their executive and staff compensation for 2020, pushing market values even higher. In addition, the Employment Cost Index -Construction (ECI) reflected a 2019 third quarter 12 month increase of $3.7 \%$ and a fourth quarter increase of $3.8 \%$. Typically pay increases run a percent or more above the ECl . As a result, many contractors will still have to modify their pay programs just to remain competitive in 2020.

We just finished up the 2020 Construction / Construction Management Staff Salary Survey. The results indicated a $3.9 \%$ increase for middle managers and professionals in 2019 (The 2nd quarter CCQ will highlight this survey). The forecast for 2020 is $3.6 \%$. Will that materialize? We will be asking the same participant group to update their 2020 forecast in June to get a better handle on how the rest of the year will play out.

Bottom line - even in uncertain times, pay will continue to grow and compensation programs need to be adjusted to stay competitive.
